The amendment filed on 2/28/08 canceling all claims drawn to the elected invention and presenting only claims drawn to a non-elected invention is non-responsive (MPEP § 821.03). The remaining claims are not readable on the elected invention because they are directed to a different method of treatment. New claim 20 is directed to a method of preventing severe vascular thrombosis in a patient comprising administering to said patient a protein comprising the amino acid sequences set forth in SEQ ID NOS: 1, 2, 3, 4, and 5.

Elected claim 14 was cancelled and replaced by claim 17 for examination. Claim 14 was directed to the utilization of the prothrombin activator of claim 13, characterized by enabling to be using prothrombin activator as a dysfibrinogening agent in prothrombotic state patients. Claim 17 was directed to a method for treating prothrombotic disorders in an individual in need thereof comprising administering to said individual an effective dose of a prothrombin activator protease comprising at least one amino acid sequence selected from the group consisting of SEQ ID NOS: 1, 2, 3, 4 and 5, wherein said effective dose prevents blood clot formation.

The method of claim 20 differs significantly from claims 14 and 17 in the method steps performed and the intended result. Furthermore, there is no basis in original claim 14; page 16, lines 18-28; and/or pages 24-38 for the method and limitations set forth in new claims 20-23.

Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.
